ATH17758 HO RTR 53' CIMC Container, Twin Logistics (3)

•Brand new road name

All Road Names

PROTOTYPE AND BACKGROUND INFO:

An intermodal container is a large standardized shipping container, designed and built for intermodal freight transport, meaning these containers can be used across different modes of transport – from ship to rail to truck – without unloading and reloading their cargo. Corrugating the sheet metal used for the sides and roof contributes significantly to the container's rigidity and stacking strength, just like in corrugated iron or in cardboard boxes.

MODEL FEATURES:

- Fully assembled
- Newest horizontal rib front
- Easily stackable
- Separately applied door closure rods
- Razor sharp printing and painting

PRIMED FOR GRIME MODELS FEATURE:

- Faded base colors matched to the prototype, the perfect starting point for adding grime and rust
- Patches applied and shaped per road number matching each corresponding side to the prototype
- Duplicated look and feel of "In Service" equipment; "Tattered and Torn" just like the real thing
- Some Prime for Grime models feature paint scheme variations

#Ready2Rust

\$36.98 SRP - Per Set
