PROTOTYPE SPECIFIC INFORMATION

The 50ft Evans Double Plug Door (DPD) boxcar, manufactured by Evans Products (formerly U.S. Railway Equipment) during the 1960s–1980s, was a 70-ton, high-capacity car designed for loading large, light goods like lumber, paper products, and canned goods. The “double plug door” configuration allows for a wide opening, facilitating the loading of large items or palletized freight, while the plug design provides a flush interior, improving sealing for cargo protection. These versatile RBL-class insulated cars were essential for modernizing cargo handling and remained in service for decades.

MODEL FEATURES:

- Double 8’ plug door
- Highly-detailed, injection-molded body
- Separately-applied end ladders, and brake wheel
- Fully-assembled and ready-to-run
- Accurately painted and printed for prototypical realism
- Highly-detailed, injection-molded body
- Weighted for trouble-free operation
- Body-mounted McHenry® operating scale knuckle couplers
- Machined metal wheels and RP25 contours operate on all popular brands of track
- Minimum radius: 18”

\$39.99 INDIVIDUAL | \$109.99 3-PACK
