MODEL FEATURES:

- Factory assembled with many detail parts applied
- Molded cab interior with separately applied steering wheel
- Rescue body
- Clear window glazing
- Rubber tires
- Ford licensed model

PROTOTYPE AND BACKGROUND INFO:

The Ford C series is a range of trucks that was assembled by Ford between 1957 and 1990. The first cab-over engine (COE) truck produced with a tilting cab by Ford, the C-series replaced the C-series COE variant of the F-series, produced since 1948. Produced as both a straight/rigid truck and a tractor, a wide range of versions of C-series was produced. The C-series was also used as a basis for fire apparatus production.

A rescue vehicle is a specialised vehicle used in technical rescue. It is designed to transport and provide the specialized equipment necessary for technical rescue. A rescue vehicle is typically operated by a rescue squad, but in some areas it may be integrated with emergency medical services or fire departments.
